Arshdeep Singh

B.Tech. – Computer Science & Engineering, GTBIT

arshdeepgtbit@gmail.com | +91-8799793855 | linkedin.com/in/arshdeep-singh-7168a937a

Profile Summary

Computer Science Engineering graduate with hands-on experience in React, JavaScript, HTML, CSS, Python, SQL, backend development, and REST APIs. Experienced in building responsive web applications, real-time systems, dashboards, and API-driven solutions through internships and projects. Strong debugging and problem-solving skills with experience working across frontend, backend, and databases. Seeking an entry-level Web Developer role.

Education

Guru Tegh Bahadur Institute of Technology (GTBIT), GGSIPU — New Delhi
B.Tech. CSE — **87.2%** — 2022 – 2026

Mata Gujri Public School — Delhi
Class 12 (CBSE) — **96%** — 2021

Internship Experience

Zigly Pet Care — New Delhi
Full Stack Developer Intern — Sept 2026 – Present

Contributing to full-stack application development for e-commerce operations, working on order and inventory workflows, system integrations, data processing, and debugging to improve application functionality and reliability.

GlobalLogic — New Delhi
Engineering Intern — Jan 2026 – Aug 2026

Worked on multiple AI and full-stack applications using React, FastAPI, Python, and REST APIs, including AI chatbots, predictive maintenance dashboards, voice-enabled assistants, PPE detection systems, warehouse surveillance, and real-time digital signage platforms. Developed responsive interfaces, integrated backend APIs and AI/ML models, implemented real-time functionality, and contributed to debugging and end-to-end application development.

Defence Research and Development Organisation (DRDO) — New Delhi
Research Intern — Jul 2025 – Aug 2025

Authored technical review paper and presented findings to seniors.

Encryptix — Remote
Web Developer Intern — Jul 2024 – Aug 2024

Built responsive UI components using HTML, CSS, and JavaScript.

Projects

Real Estate Marketplace — Self Project
2024

Developed a full-stack real estate platform enabling users to list, search, filter, and enquire about properties using React, Node.js, Express, and MongoDB.

E-Commerce Platform — Self Project
2025

Developed a full-stack eCommerce platform with a responsive customer storefront and dedicated admin dashboard using React, Node.js, Express, MongoDB, and Tailwind CSS.

BuildLoop: AI-Powered Product Management Platform — Major Project
2026

Developing an AI-powered product management platform that ingests raw user feedback, clusters it into actionable insights, generates a prioritized feature roadmap, and syncs it with a Kanban board.

Building a RAG-based code Q&A workspace using Voyage AI embeddings and Pinecone to enable semantic code search and context-aware developer assistance.

Personal Knowledge Base Copilot (RAG) Self Project
2026

Developing an AI-powered knowledge assistant that enables users to upload PDFs, Markdown files, notes, Notion exports, and web content for conversational question answering.

Building a Retrieval-Augmented Generation (RAG) pipeline using vector embeddings and semantic search to provide context-aware, source-grounded responses from user documents.

Skills

Frontend: HTML, CSS, JavaScript, React.js, Responsive UI
Backend: FastAPI, Node.js, REST APIs
Databases: PostgreSQL, MongoDB, SQL
Tools: Git, GitHub
Programming: Python
Additional: Machine Learning, TensorFlow, Power BI, Excel
Core: Debugging, Problem Solving, Analytical Thinking

Certifications

Deep Learning & NLP Training
Online 2025

Covered neural networks, ANN architectures, and NLP fundamentals.
